EDUCATION

Indira Gandhi National Open University (IGNOU)

Jul 2025- May 2027

Master of Computer Applications (MCA) – Pursuing

Focus: Database Management, Backend Development, Cloud Computing, Data Structures & Algorithms

BRABU UNIVERSITY

Apr 2019 - May 2023

Bachelor of Computer Application (BCA)

Major in Computer Science

Relevant Coursework: Database Management Systems (DBMS & RDBMS), Software Engineering,

Computer Applications

WORK EXPERIENCE

PLUS DISTRIBUTION PRIVATE LIMITED

Gurugram, Haryana

SQL Developer

Feb 2024 - Present

- Engineered advanced SQL solutions (joins, subqueries, stored procedures, functions, triggers, cursors, CTEs, window functions, indexing, partitioning) reducing query execution time by 25% on 3M+ records.
- Designed and implemented ERP & HRMS databases (Sales, Purchase, Products, Ledger, Attendance) with normalization, indexing, and relational integrity, ensuring scalability.
- Automated attendance tracking logic with triggers, CTEs, and error handling for real-time absentee marking, shift validations, and HR analytics.
- Developed dynamic dashboards & reports using views, CTEs, and window functions to drive data-informed decision-making.
- Strengthened data integrity & reliability through transaction control (TCL), error-handling frameworks, and logging mechanisms.
- Collaborated with cross-functional teams to optimize database performance, enforce data validation, and streamline deployments, reducing manual effort.
- Built and optimized ETL pipelines using SQL Server Integration Services (SSIS) for data extraction, transformation, and loading, enabling smooth integration between multiple systems.

PANFLASH TECHNOLOGIES

Greater Noida, Uttar Pradesh

Back End Developer

Aug 2023 - Jan 2024

- Developed and optimized RESTful APIs using FastAPI & Python for ERP/HRMS modules, handling CRUD operations and high-concurrency workflows.
- Implemented JWT authentication, role-based authorization, and session management to ensure secure access across endpoints.
- Designed scalable SQL (PostgreSQL, MySQL, MS SQL) & MongoDB schemas, applying DDL, DML, DCL, and TCL best practices.
- Built and validated Pydantic models for request/response handling, ensuring data consistency and reliability.
- Improved performance by developing asynchronous APIs with SQLAlchemy ORM & MongoDB drivers, achieving sub-100ms response times.
- Applied dependency injection, middleware, and logging in FastAPI for authentication, monitoring, and error handling, boosting maintainability.
- Created ETL pipelines for data ingestion, transformation, and synchronization between relational databases.

PROJECTS

ERP Database System

- Designed and implemented a comprehensive ERP database covering Sales, Purchase, Products, Users, and Ledger modules.
- Built Product Master, Customer, Vendor, and Transaction tables with normalization, indexing, and constraints for optimized performance.
- Developed stored procedures, triggers, views, CTEs, and functions to automate reporting, handle transactions, and ensure real-time synchronization.
- Integrated role-based access and data validation for secure operations in Sales and Purchase workflows.

Web Application - Backend Development with FastAPI & Databases

- Developed a secure FastAPI-based web application with JWT authentication, role-based authorization, and password hashing.
- Integrated SQL (PostgreSQL/MySQL) and MongoDB for user/session management with token refresh & expiration.
- Added middleware for logging, monitoring, and rate limiting, improving reliability and preventing abuse.
- Built RESTful & asynchronous APIs with FastAPI, SQLAlchemy ORM, and MongoDB drivers, achieving sub-100ms response times.
- Designed Pydantic models for strict request/response validation, ensuring consistent and secure communication.

SKILLS

Databases & Data Engineering

- Advanced SQL (Joins, Subqueries, Stored Procedures, Functions, Triggers, CTEs, Window Functions, Indexing, Cursors, Partitioning, Query Optimization)
- MS SQL Server, MySQL, PostgreSQL, MongoDB (Schema Design, CRUD, Query Optimization)
- Transaction Management (DDL, DML, DCL, TCL)
- ETL Pipelines & Data Warehousing (SSIS, DataBricks, DBEaver)

Programming & Backend

- Python (OOP, Data Structures, Scripting)
- FastAPI (CRUD APIs, JWT Authentication, Role-based Authorization, Async APIs, Middleware, Pydantic Models, SQLAlchemy ORM)
- Django (MVC, Authentication/Authorization, ORM, API Integration)

TOOLS

Databases: MS SQL Server, MySQL (Workbench), PostgreSQL, MongoDB (Compass)

ETL & Data Warehousing: SSIS, DataBricks

Database Management Tools: SQL Server Management Studio (SSMS), DBEaver

IDEs & Editors: VS Code, PyCharm

Version Control: Git, GitHub

Visualization & Productivity: Power BI, Microsoft Office Suite (Word, Excel, PowerPoint)

ADDITIONAL

Languages: Fluent in Hindi and English

Certifications: Python Fundamentals (Great Learning), SQL for Data Analytics (Udemy)
